Security Cameras & Monitoring

Remote Services On the Go and in the Know

Stay in the know wherever you go with the Mooncomputers Connect Remote Services. Real-time alerts, video viewing and mobile remote control put peace of mind in the palm of your hand —helping you stay connected to your business with compatible smartphones, tablets or PCs.

Apps

With the tap of a finger, the apps let you operate your security system, receive text messages and e-mail alerts—even view live video on your iPhone®, iPad®, BlackBerry® or Android™ devices. What could be more appealing than that?

System Design & Installation

Our engineer based consultants are able to offer detailed system design, leading onto completion and as-built documentation.

A solid base and design foundation is critical in delivering a project on time and on budget.

Based on 10 year experience the installation is completed with minimal fuss and disturbance

Maintenance

Electronic security and surveillance equipment requires regular maintenance to remain effective.

External systems normally require servicing twice a year, internal systems just once.

Camera systems can be remotely controlled, as well as monitored
