

mooncomputers

Silverstone Formula One Wifi Login System

Mooncomputers delivered event Wi-Fi for 5000+ campers at Whittlebury Park, one of the main campsites for the F1 weekend. A team of moon technicians nicknamed 'moon gurus' installed the Wi-Fi network running from Thursday to Sunday with promotional support from the 'moon babes' helping campers over the weekend access the vast Wi-Fi network. Working at such a prestigious event concluded with a very positive 'Thanks, GREAT JOB' from the client, a fantastic result for the Mooncomputers team.

Outdoor event Wi-Fi is a highly specialised area and Mooncomputers is at the leading edge of this technology; call Mooncomputers and get a guru to help you with all types of Wi-Fi installations.

Mooncomputers core business is IT support supplemented by hosting email and telephone systems, delivering broadband, managing cloud storage and servers and providing back up and disaster recovery plans. Additionally they can supply personalised corporate wear, promotional products and branded merchandise along with competitively priced stationery including printer toners.

The IT specialists offer a wide range of support packages to meet the needs of businesses with IT solutions, IT services and IT support. Where a business finds it does not have the need for a permanent, on-site IT service, Mooncomputers can give the professional support to give peace of mind and confidence they are using IT to meet their potential. Clients can call the helpdesk for support and, if it is not possible or practical to solve the issue through the remote service, then one of the experienced network engineers are available. Monthly visits to each business give clients an opportunity to discuss any issues or look at different options to fine tune their systems.

How it works

The ZoneFlex access points create a 5Ghz mesh network, ensuring maximum wifi coverage and reliability

To access the internet, user's simply need to fill out a web page registration form.

Once registered, the data is saved and the user is allowed to browse the web freely
